PHILIPS TECHNICAL REVIEW

VOLUME 14

1952/1953

PHILIPS RESEARCH LABORATORIES - EINDHOVEN

52
B 1428 UD

CONTENTS

VOLUME 14, 1952/1953

LIGHT

Page

Ways to comfortable lighting, by L. C. Kalff 69

Some of the effects of the relative length of day on Poinsettia and Populus, by R. van der Veen 175

Apparatus for measuring light distributions, by L. de Wit 200

Photosynthesis, by R. van der Veen 298

TELECOMMUNICATION

High-tension generators for large-picture projection television, by J. J. P. Valeton 21

Magnetrons, by J. Verweel 44

A 3 cm-magnetron for beacons, by G. A. Espersen and B. Arfin 87

An instrument for measuring complex voltage ratios in the frequency range 1-100 Mc/s, by G. Thirup 102

Electronic tubes, by J. L. H. Jonker 117

The impulse-governed oscillator, a system for frequency stabilization, by E. H. Hugenholtz 130

Coaxial cable as a transmission medium for carrier telephony, by H. N. Hansen and H. Feiner 141

The noise of electronic valves at very high frequencies, by G. Diemer and K. S. Knol,
I. The diode 153
II. The triode 236

A stabilised extra-high tension rectifier for 5000 V, 50 mA, by P. Périlhou and J. Cayzac 190

High-power transmitting valves with thoriated tungsten cathodes, by E. G. Dorgelo 226

A steel picture-tube for television reception, by J. de Gier, Th. Hagenberg, H. J. Meerkamp van Embden, J. A. M. Smelt and O. L. van Steenis, with an introduction by J. G. W. Mulder 281

Mechanism of the synchronization of *LC*-oscillators, by J. van Slooten 292

An oscillator with constant output voltage, by L. Ensing and H. J. J. van Eyndhoven 304

A decade counter tube for high counting rates, by A. J. W. M. van Overbeek, J. L. H. Jonker and K. Rodenhuis 313

New developments in the image iconoscope, by J. C. Francken and H. Bruining 327

A rubber membrane model for tracing electron paths in space charge fields, by G. A. Alma, G. Diemer and H. Groendijk. 336

An experimental 100 kW television output stage, by D. Zaayer 345

A short length direct-view picture-tube, by J. L. H. Jonker 361

A West-European television network on the occasion of the Coronation celebrations in London 358

X-RAYS AND NUCLEAR PHYSICS

The linear electron accelerator, by D. W. Fry 1

Electronic intensification of fluoroscopic images, by M. C. Teves and T. Tol . . . 33

An experimental X-ray apparatus with midget X-ray tube, by P. J. M. Botden, B. Combée and J. Houtman 165

The synchrocyclotron at Amsterdam, IV. Details of construction and ancillary equipment, by F. A. Heyn and J. J. Burgerjon 263

A decade counter tube for high counting rates, by A. J. W. M. van Overbeek, J. L. H. Jonker and K. Rodenhuis 313

A battery-operated Geiger-Müller counter, by G. Hepp 369

SOUND

Magnetic sound recording equipment, by D. A. Snel 181

MEASURING EQUIPMENT

An electrical roughness tester for the workshop, by G. W. van Santen 80

An instrument for measuring complex voltage ratios in the frequency range 1 - 100 Mc/s, by G. Thirup 102

Apparatus for measuring light distributions, by L. de Wit 200

Measuring methods for some properties of Ferroxcube materials, by C. M. van der Burgt, M. Gevers and H. P. J. Wijn 245

A direct reading precision polarograph, by H. A. Dell and C. H. R. Gentry . . . 257

A battery-operated Geiger-Müller counter, by G. Hepp 369

MATERIALS AND THEIR RESEARCH

Strain ageing in iron and steel, by J. D. Fast 60

Low-hydrogen welding rods, by J. D. Fast 96

Hardening of metals, by J. L. Meijering 203

Measuring methods for some properties of Ferroxcube materials, by C. M. van der Burgt, M. Gevers and H. P. J. Wijn 245

A steel picture - tube for television reception, by J. de Gier, Th. Hagenberg, H. J. Meerkamp van Embden, J. A. M. Smelt and O. L. van Steenis, with an introduction by J. G. W. Mulder 281

MISCELLANEOUS

The role of the electron microscope in the investigation of plant diseases, by E. van Slogteren 13

Some of the effects of the relative length of day on Poinsettia and Populus, by R. van der Veen 175

High speed photography by means of the image converter, by J. A. Jenkins and R. A. Chippendale. 213

Photosynthesis, by R. van der Veen . . . 298
